## OPEN SOURCE CONTRIBUTIONS

---

- **FreedomBox- Setting Up Community Network** FreedomBox is a decentralized personal server running free software for private, personal communications. I had setup services including personal calls, conferencing, local cloud storage, Village Radio.

Project Link : <https://code.swecha.org/swecha-ap-vtp-2019/freedombox/-/issues>

- **GNU Guix** Guix System is an advanced distribution of the GNU operating system. I made few contributions to the Guix project by writing package descriptions and solved few issues in the git as a part of outreachy tasks.

Project Link : <https://git.savannah.gnu.org/cgit/guix.git/log/?qt=author&q=Naga+Malleswari>

- **Weather Monitoring System using Node MCU** I developed A Real-time weather monitoring station which aids farmers in protecting their crops which can be visualized easily using tools like Things Board, Graphana etc.,
